

Making Paper Simple™

NO HARDWARE
NO SOFTWARE
NO CAPITAL INVESTMENT
AND THE RISK IS ON US.

AP WORKFLOW

WORKFLOW THAT SAVES MONEY NOW

FACILITATING TRANSFORMATION Scan One offers AP workflow in the form of “software as a service”. Components are delivered via the web in a secure, hosted and flexible environment. What does this mean to you? No hardware, no software, no capital investment, and the risk is on us. You can follow your own path to AP process transformation. AP Workflow is a module of the TransAct AP suite of services.

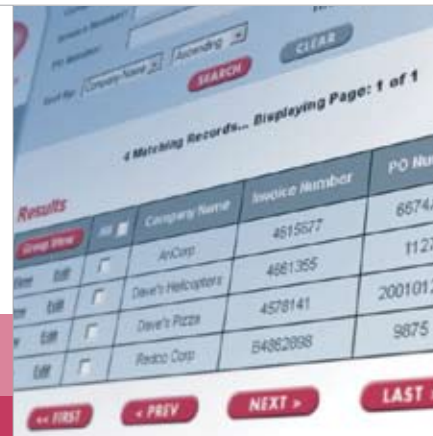

AP WORKFLOW Scan One delivers AP workflow services via a simple, yet sophisticated online tool. It is easily configurable for low or very high invoice volumes and greatly improves processes with either. It is well-suited for the inherent complexities of large companies and can completely transform the processes of any AP department. Other high-level AP workflow products have one or two strong capabilities such as multi-language, multi-currency, intelligent line item matching, or are based in a P2P (procure to pay) environment. However, our product is the only one with the total package - all of the most sophisticated features on the market. It is also the only offering in its breed to be completely web-based and delivered as a flexible service. Scan One has AP workflow solutions to fit every automation requirement.

Why is Scan One the best possible and most viable partner to deliver these workflow solutions? Because we have deep roots in capture offerings. AP Capture provides front-end specific capture services that were actually designed to establish and facilitate AP workflows. Scan One has quickly become an established leader in this market. We understand that capture and workflow go hand-in-hand, and this is how we have become the only AP automation services provider to be a true expert in both areas. Our AP Workflow services are best leveraged when paired with AP Capture, however, our modular cosourced approach allows them to be subscribed to separately if desired.

SCAN ONE Scan One offers a valuable collection of innovative web-enabled solutions and capture services that automate paper-intensive business transactions. Scanning, data capture, and automated workflow services are delivered through the TransAct solution suite. With a deeply integrated culture of privacy, a combination of people, processes, and technology, and over twenty years of experience, Scan One has earned their customer's trust and confidence in handling critical documents and data. Scan One eases the challenge of paper tasks, expedites vital decisions, and transforms business processes.
