SCAN ONE OUTPERFORMS IN-HOUSE OCR

WHY INVEST IN YESTERDAY'S TECHNOLOGY?

MORE COST EFFECTIVE Scan One is a more cost-effective choice than in-house OCR. Long promised as the solution to time-consuming data entry for AP professionals, OCR is still a failed technology for the special needs of AP. OCR isn't an efficient, cost-effective solution for the unstructured, complex documents required by AP.

CONSIDER THE FOLLOWING

- 0 OCR's inaccuracy cancels any perceived labor savings
- 0 OCR correction requires an AP specialist
- 0 Hardware / software / maintenance costs cannot be justified since data requires additional clean-up
- 0 Rather than reduce FTE, OCR often requires additional technical staff

OCR DOES NOT ADDRESS

- 0 Monetary loop items such as tax and freight
- 0 Units of measure and line item details
- 0 New vendors

SCAN ONE PROVIDES

- 0 Configurable business rules for your workflow
- 0 Dual-pass human data entry – accurate and complete
- 0 99.5% keystroke accuracy

Most important of all, Scan One assumes all of the risk of keeping current with hardware / software issues. Scan One always has the most up-to-date technology and methodology – our business depends on it.
