

Making Paper Simple™

NO SOFTWARE
NO CAPITAL INVESTMENT
NO RISK
IMMEDIATE SAVINGS

TRANSACT AP

OUR SPECIAL SAUCE, WHY WE ARE BETTER

What if there were an effective and cost reducing product available that could manage and eliminate the overwhelming volumes of paper associated with accounts payable? What if that same solution could help you maximize automation of your AP process, significantly improve efficiency and nearly eliminate errors and delays in processing? What if you could transform your AP process with no investment in hardware or software? And finally, what if there were an AP service provider that understood AP processing at the same level of skill and scale that ADP understands payroll?

At Scan One, accounts payable and automation of AP processing are the heart of our business. From credit memos to monetary loops, from progressive invoicing to dynamic discounting, we understand AP at the same level or skill and scale that ADP understands payroll.

OUR SPECIAL SAUCE Our product, *TransAct AP*, is specifically designed to leverage and optimize automation opportunities by preparing your invoices for your workflow and applying your business rules at the point of capture rather than downstream. We call this our *Business Process Engine* and it will enhance your AP process beyond anything you've experienced. It's our special sauce, so to speak.

This unique difference in approach allows us to eliminate paper, dramatically reduce errors and automate over 80% of your pre-control work. The remaining 10-20%, usually exceptions, can be handled electronically via our *Online Document Center (ODC)*. Your staff will spend their time focused on knowledge work rather than busy work.

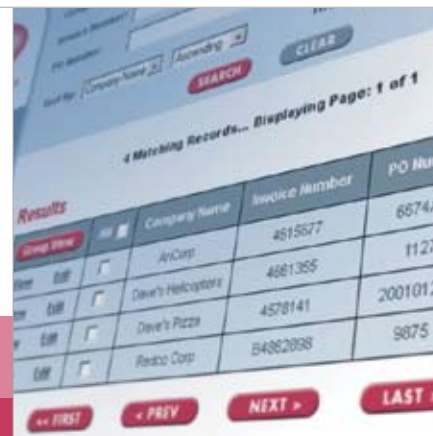

FLEXIBLE OPTIONS *TransAct AP* offers two levels of AP processing: *AP Capture* and *AP Workflow*. This flexible, modular product allows us to tailor your AP solution to your specific needs. *AP Capture* was specifically designed to facilitate and greatly enhance any invoice workflow product - ours, yours, or even theirs. By using both of *TransAct AP's* product modules, *AP Capture* and *AP Workflow*, the invoice capture, coding, and approval process is seamlessly handled, start to finish. Or we can integrate with your proprietary in-house process or other processing products. Whichever approach you choose, your AP processing will be transformed to a level of accuracy and automation that far exceeds your expectations or previous experiences.

SKILL, SCALE, SECURITY We take the worry and risk out of AP processing for some of the largest, most recognizable companies in the world, with monthly AP transactions ranging from a few thousand to tens of thousands. We provide them with guaranteed next day turnaround, over 99.5% accuracy, SAS 70 Type II audited controls, and HIPAA level security. That is why we call ourselves "Peace of Mind Specialists". As Scan One's client, you will have the benefit of our level of skill and scale, which translates to cutting edge technology, fiercely managed process and cost savings on multiple levels, without any capital investment on your part.

Let Scan One handle the risk and the busy work in AP processing. You'll have to handle the kudos.
